Module Description

- ✚ This is a 2 day Home-Based Isolation and Care training that is prepared for frontline Health Care Workers involved in HBIC. It enables participants to address patients in HBIC according to the guideline during assessment, enrollment, follow up, referral and discharge.

Module Goals

- ✚ To provide participants with the Knowledge, Skill, and Attitude required for HBIC during assessment, enrollment, follow-up, referral, discharge and reporting.

Participant Learning Objectives

- Translate the implementation guideline into practice.
- Identify patients who are eligible for HBIC
- Practice the appropriate Basic hygiene and IPC protocol during implementation of HBIC
- Classify patient who are high risk during follow-up.
- Engage actively in the Health Education and Community Engagement
- Practice the up-to standard follow-up of enrolled patients
- Practice the appropriate protocols during referral linkage and patient transfer to treatment centers
- Analyze the available data of enrolled HBIC patients.
- Interpret and propose an action plan for possible intervention.
- Monitor and evaluate the implementation process.

Training/Learning Methods

- Illustrative Lectures
